Water stress solutions

Infrastructure

Civil engineering

- > Reservoirs and tanks
- > Lifting and pumping stations
- > Wastewater treatment plants and technical rooms
- > Stabilisation works
- > Wind turbine bases

Underground works

- > Galleries
- > Tunnels until \varnothing 3,000mm
- > Shafts

Ensuring business continuity

Our innovative techniques

- > Building at a height, underground, or in an aquatic environment
- > Rehabilitation by trenchless works to visitable and non-visitable facilities
- > Renewal of facility waterproofing
- > Network mapping and survey

Sustainable development actor

CTHM is fully aware of its responsibility and is engaged on a daily basis in protecting the planet, by promoting trenchless techniques to decarbonate its activities, using electric machinery on its worksites and solar-powered lighting on its premises, or organising waste collection campaigns.
